Patient Information

Medicare will only pay for services that it determines to be reasonable and necessary under section 1862 (a) (1) of the Medicare Law. When ordering tests for which Medicare reimbursement will be sought, physicians should order only those individual tests that are necessary for the diagnosis and treatment of a patient, rather than for screening purposes.

See website for additional information on panel components. http://labs.unchealthcare.org/labstestinfo/i_tests/igep.htm
