Printed Name/Signature of Referring Nephrologist: Date:

UNC KIDNEY TRANSPLANT CRITERIA

Absolute Contraindications for Kidney Transplant:

- Active TB
- Active substance abuse
- Serious cardiac, pulmonary, or other comorbid conditions that create an unacceptable risk for transplant surgery or transplant immunosuppression
- Smoking cigarettes, e-cigarettes, vaping, and using smokeless tobacco. Patients may be evaluated for transplant, but must report that they have stopped using these products for one month before being listed active.
- Patient lacks desire for transplant

Relative Contraindications for Kidney Transplant:

- Non-stable HIV+
- Goodpasture's Syndrome with persistent presence of anti-GBM antibodies
- Active systemic infection
- BMI > 40%
- Severe advanced vascular disease
- Inability to adhere to a medical regimen
- Pediatric patients with weight less than 10 kg
- Malignancy with prognosis suggesting an anticipated survival of < 5 years
 - History or presence of malignancy requires a disease-specific treatment plan and may require an extended wait period prior to active listing
- Age > 80 years old
- Inability to meet the financial obligations projected for transplantation, immunosuppression, and supportive therapies.

NOTE: Once these relative contraindications are resolved or controlled, the patient may again be eligible for consideration.
