Cardiology Pharmacy Internship

Acute Care Services | UNC Health Pharmacy Internship Program

A year-long program designed to develop pharmacy leaders through concentrated clinical experiences and longitudinal project management. The experience begins with an 8-week full-time clinical immersion, followed by longitudinal projects and Medication History Services staffing.

Previous Intern Projects

- Impact of AV nodal blockers on incidence of heart block and permanent pacemaker placement post-transcatheter aortic valve replacement (research)
- Argatroban in CRRT MUE
- Literature Evaluation: Renal Function Definitions for Cardiac Medications
- IV Iron Literature, Guideline, and Workflow Evaluation
- Discharge Note Template Creation

Theresa Kline, PharmD, BCPS, BCCP (theresa.kline@unchealth.unc.edu)
