

The Hematology Oncology Intern Program

Operational Experience

Integration into the operations of the Cancer Hospital Infusion/Inpatient Pharmacy

Clinical Practice Experience

Exposure to the roles and responsibilities of an oncology clinical pharmacist

Professional Development

Engage in activities that build readiness for career growth

Who We Are?

The hematology oncology intern program is a two-year paid internship through the UNC Medical Center focused on oncology pharmacy services, that begins the spring of the first year and ends at the conclusion of the third year of pharmacy school.

What We Offer

Interns in the program are offered unique hands-on experiences that contribute to the clinical, operational, and patient-focused aspects of oncology pharmacy practice.
